SUMMARY

Front end developer at Distacart Inc and the only developer on the UI of DistaUSA, a live Shopify store whose daily orders grew from about 50 to about 200 while I owned its redesign and new features. Comfortable across HTML, CSS, JavaScript, Liquid and React, with a machine learning background from undergraduate projects. Currently pursuing an MTech in Artificial Intelligence and learning prompt engineering and AI agent development.

EXPERIENCE

Front End Developer, *Distacart Inc* Aug 2025 - Present

- Sole front end developer for DistaUSA, a Distacart sub-brand on Shopify; responsible for UI design, theme development and day-to-day maintenance of the storefront.
- Redesigned the entire storefront and shipped new sections and features, many based on my own research of leading e-commerce sites; daily orders grew from about 40-50 to about 200 over this period.
- Designed and built all customer-facing pages in Liquid, HTML, CSS and JavaScript on top of a backend managed through the Apploy app.
- Worked with the teams behind third-party apps integrated into the store to trace and fix integration bugs, and resolved new production issues as they came up.

Front End Developer Intern, *Distacart Inc* Jan 2025 - Aug 2025

- Maintained a production Shopify website while learning theme customisation, store management and Shopify app development; offered a full-time role at the end of the internship.

Web Development Intern May 2024 - Jun 2024

- Completed hands-on training in React fundamentals and built several small websites with React components and state.

Artificial Intelligence Intern, *YHills* May 2023 - Jun 2023

- Performed exploratory data analysis and visualisation on multiple datasets and built supervised classification and regression models.

PROJECTS

Cost-Optimized Predictive Maintenance for Wind Turbines | *Python, XGBoost, scikit-learn, Streamlit* Final year project

- Predicted generator failures from 40 sensor features (40,000 training records) using a custom metric that weighs repair, replacement and inspection costs instead of plain accuracy.
- Compared 7 algorithms on original, SMOTE-oversampled and undersampled data; a tuned XGBoost pipeline scored 0.79 on the test set, keeping maintenance cost within about 1.26x of the minimum. Deployed with Streamlit.

YouTube Video Summarizer | *Python, Google Gemini API, Streamlit*

- Built a tool that fetches a video's transcript through the YouTube Transcript API and generates concise notes with Gemini using a structured summarisation prompt.

Care Companion | *PHP, JavaScript, HTML, CSS* Hackathon

- Developed a web platform that connects caretakers with people who need care within the same locality.

TradeLiber - Online Book Reselling System | *PHP, MySQL, HTML, CSS*

- Built a marketplace where students list and buy second-hand books at low cost, with listings stored in MySQL.

EDUCATION

MTech, Artificial Intelligence, *Vignan's Institute of Information Technology* 2026 - 2028

BTech, Computer Science and Engineering, *Vignan's Institute of Information Technology* | CGPA: 9.56/10 2021 - 2025

Intermediate (MPC), *Sri Chaitanya Junior College* | 975/1000 2019 - 2021

SKILLS

Front End: HTML5, CSS3, JavaScript, React, Responsive Web Design, UI/UX Design
Shopify: Liquid, Theme Development, Shopify App Development, Third-Party App Integration, Store Management
Languages and Backend: Python, PHP, Node.js, C++, Data Structures and Algorithms
AI and ML: Machine Learning, scikit-learn, XGBoost, TensorFlow, OpenCV, Pandas, Prompt Engineering, AI Agent Basics
Databases and Tools: MySQL, PostgreSQL, NoSQL, Git, GitHub, Jupyter Notebook, Streamlit

ACHIEVEMENTS AND CERTIFICATIONS

- 9th rank at Code-Furia 6.0, JNTU-GV College of Engineering; 5th rank at a college-level ML hackathon.
- Solved 300+ data structures and algorithms problems; 3-star coder on CodeChef (highest rating 1642).
- Certifications: Responsive Web Design and JavaScript (Sololearn), Python Basic (HackerRank), NoSQL Basics (IBM).
